XCelsius® Cover for Large Kamado Barbecues

This protective cover is designed to protect your kamado barbecue from weather conditions such as rain, dirt, dust and sunlight during outdoor use and storage.

Use

Place the cover over a completely cooled and dry kamado barbecue. Make sure the cover fits properly and fully covers the barbecue. Fasten the straps on the sides using the plastic buckles and tighten them to ensure the cover stays securely in place and does not come loose in windy conditions. Remove the cover before using the barbecue.

Safety Warnings

Use the cover only on a completely cooled kamado to prevent damage or fire risk. Do not place the cover over a hot or still burning barbecue. Make sure the kamado is dry before applying the cover to prevent mold formation. Keep the cover away from open flames, sparks and other heat sources. Use the cover only for covering the barbecue and not for other purposes. Secure the cover properly to prevent it from coming loose in windy conditions. Keep the cover out of reach of children and pets to prevent suffocation risk. Clean the cover only according to the recommended instructions and avoid harsh cleaning agents. Check the cover regularly for damage and replace it if necessary. Store the cover dry and clean when not in use.

Cleaning and care

Clean the cover with a soft cloth and cold or lukewarm water. Do not use harsh cleaning agents or abrasive materials. Washing the cover is possible, but not recommended. Allow the cover to dry completely before reuse or storage. Store in a dry and well ventilated place.

Materials

100% 600D Nylon

Washing

Machine Wash at 30°C

Do Not Bleach

Do Not Iron

Air Dry

Keep Away from Fire
